

Bona Deep Clean Solution

1500 ml

RECOMMENDED FOR USE ON ALL TYPES OF WOODEN DECKING

Cleaning of wood and composite decking

1. Remove loose dirt, moss etc. from the decking. Check for and correct protruding nails and screws. Protect sensitive surfaces such as plants and aluminium details from stains.
2. Dampen the decking with water.
3. Mix a 10 % solution of Deep Clean Solution with water and apply generously on a 5-10 sqm section and let sit for a few minutes. A good way to apply the product is to first pour the Deep Clean Solution into a clean, plastic bucket and then distribute it with a roller.
4. Scrub the current section using a hard bristled brush or scrub using the Bona PowerScrubber equipped with red or orange brush rollers.
5. Flush away loosened material with water and continue with the next section.
6. Allow decking to dry thoroughly before surface treating with decking oil.
